FELLOWSHIP SUPERVISORS:

Dr. Larry Byford Dr. Calvin Thompson

FELLOWSHIP

OVERVIEW

The Department of Anesthesiology of the Ottawa Hospital offers a Thoracic Anesthesiology Fellowship Training Program. The Ottawa Hospital is a tertiary care center in the National Capital Region. Thoracic Surgical services are provided at the General Campus of the Ottawa Hospital, and is a referral centre for Eastern Ontario.

Fellows will gain expertise in the care of routine Thoracic Surgical patients. There are more than 450 lung resection procedures and over 50 esophageal resections performed each year. Fellows will also gain experience in the care of patients for tracheal resection, resection of mediastinal masses, VATS and sleeve resections. Proficiency will be gained in perioperative optimization of the thoracic surgery patient, advanced

lung isolation techniques, and postoperative analgesic techniques.

The Fellowship schedule includes 2 days a week practising Thoracic Anesthesiology, 2 days a week clinically in non-Thoracic operating rooms, and approximately one non-clinical day per week. Fellows are expected to pursue one research project during their training period, and be active in the education of Anesthesiology residents and students in the program.

POSITIONS: 1

LENGTH OF TRAINING:

12 months preferable
